General Description of the Purkeville Hydropathic Institute.

The main institute is three stories high, standing back

walks and planted with trees, enrops, ac. On the left of the entrance to these grounds is a cottage containing four rooms, used by male patients as a bathing house, wit every convenience for "packing," bathing, &c.; on the right of the entrance, about two hundred feet distant stands a similar cottage, used by the ladies for simila Purposes.

In the rear of the Institute, at the distance of one hun

drel fact, are three other cottages, some eighty feet apar One of these is the laundry, with a hydrant at the door the other two are occurred by the servants. Ond of these is the land of the errants.

The hydrant water is introduced into these cottages as well as into the main building, and all the waste water carried off by drains under ground.

Consist of a circular stone house Consist of a circular stone building, standing on the brow of a hill, surmounted by a large celar reservoir containing five hundred barrets, brought from a never-failing spring of pure cold water in the side of the hill, by "a hydraulic ram," a self-acting machine of cast iron, that is kept con-stantly going, night and day, by the descent of the water from the same. stantly going, night and day, by the descent of the water from the spring. The surplus water is carried from the reservoir to a foundain in the water-works yard, surround-ed by weeping willows. In the first story of the water-works is a circular room, containing the douche bath, which is a stream falling from a height of about thirty feet, and can be varied in size from half an inch to an inch and a half in diameter. Adjoining the douche room is a dresping room, with marble tables, feet the vision inch and a half in diameter. Adjoining the douche rouse is a dressing room, with marble tables, &c.; the rising douche (for the care of piles, &c.) is one of the most complete contrivances of the kind, being entirely under the control of the patient using the same.

There are many other appliances, which can be better understood by a personal examination.

Office, No. 1 Reade Street, New York.

In consequence of the great number of complaints which have for a long time-been made by Emigrants, of frauds committed upon them in the sending of money to their friends in Ireland, and to aid and protect the Emigrant, the Irish Emigrant Society established a fund, deposited in the Bank of Ireland, upon which they draw drafts, payable at sight, at any of the branches of the Bank.

Persons residing out of the city, by enclosing in a letter the sum they wish forwarded, with the plainly written direction to whom and where it is to be paid, will have the same remitted.

direction to whom and where it is to be same remitted.

There is a great advantage in purchasing the Society's drafts—that the Bank has a branch in each of the principal towns in Ireland, and thus the losses by discount, and otherwise, are avoided.

The Society keeps an office at No. 22 Spruce street, to which Emigrants can apply to obtain situations for which they are fitted.

AMERICAN TELEGRAPH

The World's Fair .- The Beginning and the End.

The exhibition in the Crystal Palace seems to have had its origin with Prince Albert and some savans with whom he is associated, and with whom he consults. Whether the idea. originated with him, or was suggested by others to him, is of little consequence, so far as his own reputation is concerned. In either case, he is entitled to great credit. He has added a wreath of fame to his previous honors, which few princes, comparatively, have had either the opportunity or the disposition to obtain. The purpose was a benevolent one, and in keeping with his general character. It seems to have been reluctantly adopted by the British rainistry, and only under the impulse of Albert's position as prince-consort. They could not run the risk of offending the Queen, in the present state of parliamentary majorities, as to do so might turn the balance against them upon the first occasion of important defeat. They know, by the history of England, the serious effects of a Queen's resentment, or even that of one near the person, and possessing the ear of majesty. Lord John Russell is a good historian, and has himself written well. He knows the consequences that have attached to spilling a cup of tea on a lady's gown, and those of spreading a costly garment for a lady's feet.

But after being forced to take up the purpose, the British ministry proceeded with a tolerably good grace and with general wisdom in carrying it out. Proposals for a plan of the building were published, and two hundred and forty-five plans submitted for examination. These came from different individuals of different countries. Mr. Paxton, gardener of the Duke of Devonshire, proposed glass. Hesitation and reluctance were, by his able arguments and sketches, changed to approval. In the hot-houses of the Duke he had learned the properties or powers of glass, and was, by his native genius, able to expound them.

The materials for the building, principally of glass and iron, were to be collected, and persons found capable of constructing it safely and skilfully. In England they were not wanting. It was built at a cost of over 79,000 pounds sterling, or upward of \$382,360.

The building proved, when finished, well adapted to the great object in view; and on the first of May, 1851, was opened. Appropriate quarters had been assigned to different countries, and the arrangements in this respect were highly judicious. The Russian autocrat and the American republic were each furnished with accommodating space. They had, as had all others, a fair field for this intellectual and mechanical conflict. There came to that arena the Russian, to show his progress from the age in which, in a certain sense, it had begun-the age of Peter the Great. The proud descendant of that monarch sent forward the proofs of mechanical skill, such as the arts afforded, which have been cultivated in his country since the time of Peter the ship-carpenter and shoemaker-for in his zeal to introduce the arts into Russia, Peter the Great learned both these

The American Republican was there with the products of his skill and intellect, and some of his raw materials. Some strong argument was to be deduced from the articles exhibited, of relative mutual progress in the respective countries, and in which of them moral and political institutions had been most promotive of human advancement. The monarchies were exultant; the great body of the exhibitors were monarchists, as were nine-tenths of the judger; there was not the least room to suspect any bias toward any production or invention of a republic and if it at all succeeded, it must be by the mere force of its own merits. Those going thither, clad in the garments of a democracy, were as uncouth to the eye of the vast majority of the spectators and judges as Ulysses in rags to the eyes of the suitors on the festal day, when the hand of Penelope was to be won by him who could draw the bow of the renowned chieftain. The feeling with which the American contributors were received and viewed is well described in the homely but vigorous lines of Punch:

"Yankee Doodle sent to town His goods for exhibition; Every body ran him down, And laughed at his position."

If, then, in the sequel he should bear off any great prize, it would be from no doubtful cause; it would be in a case as clear as sunshine. Palmam qui meruit ferat would be truly said of all laudation he might receive, and of every medal given him. Days and nights passed in which the porcupine quills of the press were fretfully thrust at the Americans, who sometimes no doubt were irritated and wounded. The yacht America was probably not regarded as more likely to win the race than the American reapingmachine was deemed worthy a prize of the first class! This last, after grave deliberation, and consultation no doubt, with British or other mechanicians, the Times described previous to trial as a hybrid between a chariot, a carriage and a wagon. That journal also described the American ploughs with similar ludicrous epithets and jeers. But the flippant sayings of national prejudice or inadequate intellect do not pass muster with men of real science; nor does the man of genius and experience, who is really a profound inventor, hide his head for the laugh of such inferior critics as he has often to encounter. The Americans did not run away from the great exhibition, although by these preliminary displays of British courtesy they were invited to do so! They might safely appeal, in consciousness of good intentions and utilitarian results, from the diatribes of the press and the censorious surmises of the crowd, to those intelligent and impartial men who constituted the iurors.

The day came for real trial, and in all inven-

tion and skill of the greatest practical utility my heart then rose to my throat. My Godfather's Prophecy; OR, THE WITHERED BOUQUET.

Now, when I thought that it was possible for Gottlieb to love as strongly as myself, and to ove the same object, I was struck with terror. The studious boy could not rival the bold, handsome hunter in his gay dress; for he was a man likely to win where he would, and I shrank from the idea of the unworthy rivalry that might thus ensue. That, at least, I would have nothing to do with. This day would I know my fate-that hour I determined to myself that would tell to Nina all my love, my hopes, and

my fears, and she herself should choose These thoughts overpowered me. What if she should really love Gottlieb best? What was to become of me in that event? Shut out from the love-light of her countenance forever, what could recompense me for my great loss? what heal the vast sorrow I must necessarily feel?

Catharine Hayes to this country when he wrote Suddenly I found myself under Nina's window. I heard her voice singing one of the songs I had taught her, and its tone made me thrill from head to foot. I could not have spoken a word to her then had the universe been at stake. I could not have stood in her presence, had it been to save my life. The awe and the dread of that moment was enough to overwhelm me. I bastened away, with the voice still ringing in my ears.

I went into the woods, and sought the dark, ombre pool, where the lilies grew, and my heart was as heavy and sad as the pool itself was still and silent, though at other times it used to speak to me in its own figurative and suggestive language, and a chill like a breath per pound. from a charnel-house made me shiver. Oh, my heart! my heart! was it not a foreboding!

I gathered the lilies, sat on the bank, and placed them beside me. I waked up from a reverie into which I had fallen, and they were withered and dead, their beauty gone, their odor still remaining, like a memory; but made me very sad, and I thought to myself, "Is not this like mourning for a dead friend?" Nina's lilies were dead, and I could not throw them

the song of the linnets in the mulberry tree. I leaned my head on my hand, and, casting my eyes on the lilies, found they were fading.

The flowers seemed to have lost their vitality that day. Why, I did not care to ask. I took out my bouquet—my withered pansies: they were "heart's-ease," but not to me, for my heart was ill at ease. I laid the lilies on the window-sill, and left the spot. I knew she had them, for, as I went away, I heard her voice say—"Karl, is it thou?" and I trembled. Her "voice was soft, gentle, and low, an excellent voice was soft, gentle, and low, an excellent thing in woman," as a great writer says; and I

> grave, however, and somewhat pale. Had he been telling her his secret? Had he been making his confession? I wrung my hands as I cast my hat down under the forest-fountain, for the air was hot and suffocating. To listen would have been a crime—to look! it was no crime; but oh! the severity of that punish-

Then he spoke out-I know not what; and she grew grave in turn. I could see that her cheek whitened, and that, while she was silent as the dead, she listened with all her soul. I could no longer doubt, and I refused to believe. What had I done to you, Gottlieb, that you should try to rob me of my love?

To listen was infamy. My heart revolted from it, and yet I could not tear myself from the spot. For just when I had gathered up my energies to go from thence, I heard her voice, deep, tremulous-majestic in its great solemnity-and she said to him-

"Yes, Gottlieb, I do-I will. There's my

hand, and with it my troth!" Terrible words to me; but what must they, on the other hand, have been to him. The gates of promise opening out into the field of life, golden with flowers and green with garlands—I, alas! was casting my eyes towards the grave. Had she so entirely forgotten me? No! God be praised! no—not quite.

"Gottlieb!-Gottlieb!" she said in such a tone-such tenderness, "what will Karl think? what will he say? and you know how he loves me. Will it not be cruel?"

"Poor Karl," said Gottlieb, and I heard no more. I did not faint, nor cry out, nor grow revengeful—wrathful—wicked! Ah, dear God! no—why should I interfere with the course of her true heartfelt love? I then knew that he had saved her life, and had a claim upon her. I trust I did not injure him by an unworthy feeling.
I could see her no more after; and when I

lay ill in my bed, and death seemed coming to me, it would have been very welcome. I had only my poor withered pansies to look upon as Her eyes, her face, her sweet white hands, I was never to look on or to touch again. "Adieu, Nina!" said I, when I looked at them now falling asunder leaf by leaf in my hands. I know not how I got up on the morning that I heard they were to be married, but I did so; and not a living soul knew of it. My godfather, who sat by my pillow day and night, was worn out with watching, and I stole forth and was in

the church ere the bridal party came. I saw them kneel at the altar. "Nina! thou wert very cruel, methinks. He could never love so I mused to myself. They were kneeling at the altar, and I heard their voices vow to love and cherish each other. Her voice was strong and firm. His was loud and manly. They both swore truly. Little did they know who was sacrificed to this terrible fidelity. No, Nina—not to him who adored thee, didst

thou come or send. I pined for her face and saw it not. When I knew it was another's, I turned my face to the wall and desired to be at peace. I still carried the pansies on my breastthey were not heart's case. It was not autumn with me-it was winter-The winds were singing dirges over my hopes. Oh, heart! heart! what didst thou not suffer?
